# CARLISE FIRM

HEIGHT 11"

### Spring System:

- a. 504 Verti Coil has consistent coverage across the surface of the bed
- b. Alternating coils evenly distribute weight and counteract force to deliver proper support and improved perimeter consistency

### Edge Support:

VertiCoil® Edge delivers a strong perimeter that reduces sagging and the feeling of roll-off at the edge of the bed.

### Support Layers:

- a. 1" High density cushion support for the base of the mattress creates a stable base for the mattress to support the sleeping surface.
- b. 1" High density foam for comfort of the mattress.
- c. 1 ½" Firm cooling quilt gel is breathable and keeps you cool with optimal Spinal support for sleeping.
- d. Rayon cooling soft comfort enables the mattress to be cooler while protecting it from heat.

# STERLING PLUSH

HEIGHT 12"

### Spring System:

- a. 672 Lura-Flex® coil is an open-end offset coil design for increased sensitivity and responsiveness to various body types.
- b. High coil counts that translate to more support for all body shapes, offering customized comfort.
- c. Consistent support and coverage across the mattress and all the way to the edge.

### Edge Support:

Foam encasement perimeter foam block around the coils creates a sturdy edge that responds along with the coils, so you can sleep all the way to the edge without feeling like you're about to fall off, and you can sit comfortably without having it collapse.

### Support Layers:

- a. 2" High density foam is exceptionally durable and long-lasting, with properties that allow the mattresses to have long lasting comfort.
- b. 2" High density cushion support for the base of the mattress creates a stable base for the mattress to support the sleeping surface.
- c. 1 ½" Super-soft cooling quilt gel is breathable and keeps you cool with optimal Spinal support for sleeping.
- d. Rayon cooling soft comfort enables the mattress to be cooler while protecting it from heat.
