

# ULTRA DURABLE COOL MATTRESSES

# ARCTIC LIFE YUKON PILLOWTOP

HEIGHT 14"

## Spring System:

- 858 Independent coil is the optimal amount of springs to conform to one's body. It has the pressure relief achieved through strategically placed comfort zones within the mattress cradling your shoulders, torso, and hips.
- Even support across the surface, keeping sleepers from rolling together at night and minimizing partner disturbance.

## Edge Support:

Foam encasement perimeter foam block around the coils creates a sturdy edge that responds along with the coils, so you can sleep all the way to the edge without feeling like you're about to fall off, and you can sit comfortably without having it collapse.

## Support Layers: Best

- 2" High density foam is exceptionally durable and long-lasting, with properties that allow the mattresses to have long lasting comfort
- 3" High density super soft creates a soft surface onto of the deep down support of the spring and ultimate edge support.
- 1" Gel memory foam creates pressure relief for one's body
- 13" tufting is a process of compressing upholstery materials to ensure they perform consistently for a longer period of time, providing consistent comfort and increasing the comfort longevity of the sleep surface.
- Rayon cooling soft comfort enables the mattress to be cooler while protecting it from heat.
- 1 ½" Super-soft cooling gel foam is breathable and keeps you cool with optimal Spinal support.
- Ice cold cover keeps one cool all nights.

HEIGHT 15"

## Spring System: Best

- Very best quality SAMSON high gauge steel Independent coil create a deep down firm support that is will never break down.
- Engineered in Switzerland for optimal precision and consistent quality.
- Even support across the surface, keeping sleepers from rolling together at night and minimizing partner disturbance.
- This spring sleeps 28% cooler than foam beds.

## Ultimate Edge Support: Best

- Foam encasement perimeter foam block around the coils creates a sturdy edge that responds along with the coils, so you can sleep all the way to the edge without feeling like you're about to fall off, and you can sit comfortably without having it collapse.

## Support Layers: Best

- High density foam is exceptionally durable and long-lasting, with properties that allow the mattresses to have long lasting comfort
- 1 ½" Furniture grade highest density firm foam will never break down and create long lasting comfort.
- 3" High density super soft creates a soft surface onto of the deep down support of the spring and ultimate edge support.
- 2" Hand **Copper**-infused ions can also be absorbed through the skin to provide the following health **benefits**: Improve the immune system to ensure better would healing and prevent bedsores. Reduce inflammation known to **benefit** conditions such as arthritis and hard-to-heal bedsores. Graphite infused memory foam is 7 times more cooling that regular gel. It is pinned to increase air flow in the mattress creating a cooler night sleep
- 15" tufting is a process of compressing upholstery materials to ensure they perform consistently for a longer period of time, providing consistent comfort and increasing the comfort longevity of the sleep surface.
- Rayon cooling soft comfort enables the mattress to be cooler while protecting it from heat.
- 1 ½" Super-soft cooling gel foam is breathable and keeps you cool with optimal Spinal support.
- Ice cold cover keeps one cool all nights.
